LANGUAGES

English, Spanish

PERSONAL

Married to Karen Maxham Hardy and the proud father of two children - our son Chase, who is an attorney in San Antonio and our daughter Paige, who is married and lives in Nashville.

NOTE FROM THE AUTHORS

Artificial Intelligence (AI) is at a critical juncture in its development, particularly with large language models like ChatGPT, Claude, and open source models from brilliant teams across the world. The article that follows, while perhaps limited in use, is what we believe to be **the first Continuing Legal Education article in the country comprised entirely by generative AI**, specifically OpenAI's ChatGPT-3.5 16k model with refinement using GPT-4 and Anthropic's Claude model. As impressive as this demonstration might seem, it's just the tip of the iceberg. The realm of AI is in a state of continuous evolution and improvement. What we consider extraordinary today is certain to be commonplace tomorrow.

Large language models, such as ChatGPT, have the potential to transform a variety of industries, including the legal profession. The ability of these models to comprehend and produce human-like text is already impacting how we conduct legal research, draft legal documents, and interact with clients. However, as we embrace the benefits of these AI models, it is also crucial to remember our responsibilities as legal professionals.

The legal profession is one rooted in precision, reliability, and integrity. We serve as stewards of justice, trusted to provide accurate and fair representations before the court. This duty extends to every aspect of our work, including the adoption and use of innovative technologies such as generative AI.

Artificial Intelligence, despite its remarkable advancements, is not infallible. The quality of output generated by AI models is heavily dependent on the input data it receives and the parameters set during its training process. While AI can assist us in myriad ways, it should not be seen as a replacement for human judgment, particularly when it comes to legal matters that involve complex ethical considerations and nuanced understandings of the law.

Therefore, while it is exciting and beneficial to utilize tools like ChatGPT to streamline our legal tasks, it is essential that we treat this as a tool – a supplement to our expertise, not a replacement. AI can provide information, but it cannot (yet) comprehend the intricacies of each unique case, nor can it empathize with the human beings involved. As attorneys, we have a responsibility to ensure the legal accuracy of our arguments, independently verify the information we present, and uphold the standards of our profession.

AI, (and specifically large language models like ChatGPT), offer extraordinary capabilities that can enhance the efficiency and accessibility of legal services. As we explore these advancements, we must maintain our professional diligence and ethical responsibilities. While AI will undoubtedly continue to advance and improve, the need for human discernment and verification in the legal field remains paramount. In this regard, the role of the attorney is not diminished, but rather, it evolves alongside these emerging technologies.

GENERATIVE AI TECH WE ARE USING IN 2023

1. ChatGPT

The gold standard of large language models, ChatGPT's GPT-4 model is the most logical and knowledgeable LLM available today. We gladly pay the \$20/month "Pro" subscription to enable unlimited outputs from the latest model as well as maintain controls over chat history and training for sensitive information. As of publication, we look forward to testing the recently announced "ChatGPT Enterprise" to further implement the tech across our firm and open access to larger word inputs and outputs.

Website: <https://chat.openai.com>

2. Claude.ai

A lean team of brilliant and reputable minds have crafted a compelling alternative to ChatGPT built upon a custom large language model up-to-date as of early 2023. Claude offers key advantages over ChatGPT specifically with word counts and the direct upload of documents. Claude can process approximately 75,000 words compared to ChatGPT's 3,000 words which makes a world of difference when summarizing large depositions and caselaw. The best part – Claude.AI is currently free.

Website: <https://claude.ai/chats>

3. Parallel Search—CaseText

This free tool allows an attorney to enter a key holding he or she hopes the court has previously articulated and find the next closest sentence. The search is not reliant on specific keywords and instead searches through context – the results can be truly

astounding. CaseText has heavily embraced large language models and has a number of compelling products that rely on ChatGPT's technology combined with a "vector" database of statutes and caselaw. The tech finds the most relevant "chunks" of cases and uses ChatGPT to parse an answer. Given the current setup, we believe that CaseText's larger product offering will face similar shortfalls as general LLM's like ChatGPT. We look forward to the inevitable development of a base LLM specifically trained on our entire body of statutes and caselaw and thus contextually aware of each part in light of the whole.

Website:

<https://parallelssearch.casetext.com>

4. Perplexity.ai – Search Engine

Perplexity is a search engine that uses ChatGPT's API to summarize the contents of top search results and compose a custom answer to specific queries. We prefer perplexity to similar offerings from Bing and Google given the speed, simplicity, and transparency of the service.

Website: <https://www.perplexity.ai>

PART 1 – AI OVERVIEW

I. Introduction: How it works. Is it Ethical?

A. ChatGPT and its development

ChatGPT, developed by OpenAI, is an advanced artificial intelligence (AI) Large Language Model (LLM) that utilizes deep learning techniques to generate human-like text responses. It is based on the Generative Pre-trained Transformer (GPT) architecture, which enables it to seemingly understand and generate contextual responses in a conversational manner.

But how do these seemingly magical programs work under the hood? The core technology is actually similar to what suggests words as you type on your iPhone's keyboard. LLMs like ChatGPT are essentially very complex, powerful versions of autocomplete algorithms. They predict the next word in a sequence by analyzing patterns in vast datasets of text from books, websites and more. The AI is "trained" by processing billions of words so it learns these patterns.

ChatGPT's training data includes nearly all of Wikipedia, thousands of novels, academic papers, news articles and online content. Its advanced neural network detects relationships between words to determine probabilities of what words will likely follow others.

So when you type a prompt, ChatGPT predicts the most likely next words just like iPhone autocomplete – except it generates entire sentences and paragraphs instead of one word at a time. The result is surprisingly human-like text, but with no human actually involved in writing it. At its core, all ChatGPT does is identify patterns in huge

volumes of text data to make statistically based guesses about what words should come next. As far as we know, it's not actually reading and comprehending.

Of course, ChatGPT has limitations compared to humans. Its knowledge stops in 2021 when the model completed training. And while errors are relatively rare, users must verify any factual claims or advice rather than assuming 100% accuracy. But despite its limitations, this technology is still immensely powerful for generating and analyzing text.

The development of ChatGPT is significant for the legal field as it opens up new possibilities for improving efficiency and productivity in various aspects of legal practice. By leveraging this AI technology, lawyers can explore innovative ways to streamline their work processes, enhance client communication, and improve the overall delivery of legal services.

B. Is it Ethical? Yes.

Artificial intelligence has sparked intense discussion in the legal community about whether tools like ChatGPT have a place in ethical legal practice. AI can be utilized safely and effectively if attorneys understand their obligations. At the end of the day attorneys are merchants of words. Discounting the technology at this early stage would be akin to early engineers criticizing the calculator or accountants touting the abacus over the spreadsheet.

A highly publicized case of attorney sanctions illustrates the potential pitfalls of AI. In 2021, a federal judge in New York sanctioned attorney Steven A. Schwartz \$5,000 for relying entirely on incorrect caselaw cited by ChatGPT in a brief without verifying it. Schwartz copied verbatim text

suggested by the AI chatbot to oppose a motion to dismiss without bothering to check whether the cases actually supported his position. Schwartz's case serves as a reminder that attorneys must confirm any AI-generated legal citations and analysis just as we would from a human assistant or associate.

This duty stems directly from ethics rules that predate AI. Texas Disciplinary Rule 3.03 prohibits lawyers from making false statements to a tribunal. Comments on the same rule note that advocates are responsible for pleadings and other documents prepared for litigation. Blind reliance on AI output without supervision breaches lawyers' ethical obligations. But that does not mean AI inherently compromises legal ethics. With proper oversight, AI can generate useful drafts and research material to enhance productivity. The key is realizing AI is not a substitute for the attorney's own analysis and judgment.

To utilize AI ethically, lawyers must rigorously check any substantive legal assertions made in AI-generated documents instead of assuming correctness. For statute and case citations, we must pull the original sources to confirm they apply as stated. And we should feel comfortable editing or deleting any inaccurate AI content that could mislead a court.

Responsible use of artificial intelligence is entirely consistent with our ethical obligations. In fact, failing to leverage AI's advantages could eventually fall below a reasonable standard of attorney competence as technology advances. But lawyers must always apply their own critical thinking instead of offloading analysis to algorithms. AI does not get lawyers off the hook ethically - it just helps us practice law better when used conscientiously.

II. The Relevance of ChatGPT in the Practice of Law

A. Overview of how AI can support the everyday practitioner

The practice of law involves a wide array of tasks, including research, document drafting, communication with clients, and case management. AI technologies like ChatGPT can play a crucial role in supporting practitioners in these aspects of their practice.

AI can assist attorneys with time-consuming tasks like legal research. ChatGPT can quickly analyze vast amounts of legal information and provide relevant summaries, enabling lawyers to find the necessary legal precedents, statutes, and case law more efficiently. This not only saves time but also ensures that lawyers have access to a comprehensive understanding of the relevant legal landscape.

Furthermore, document drafting is a vital aspect of practice. From drafting standard divorce petitions to child custody agreements, to mediated settlement agreements and proposed orders, the creation of accurate and well-crafted legal documents is essential. ChatGPT can serve as a valuable tool in this process by offering suggestions, improving language clarity, and ensuring compliance with legal standards. Lawyers can leverage AI assistance to produce high-quality drafts more efficiently, allowing them to devote more time to strategic planning and valuable client interactions.

B. Exploration of specific tasks that could benefit from AI assistance

Several specific legal tasks can benefit significantly from AI assistance provided by ChatGPT.

One such task is document review and analysis. ChatGPT can assist lawyers by reviewing legal documents for errors, identifying potential issues, and providing recommendations for improvement. For example, in the context of prenuptial agreements, ChatGPT can analyze the agreement and flag any ambiguous language or clauses that may pose problems in the future. This helps lawyers ensure the accuracy and completeness of legal documents, reducing the risk of legal disputes down the line.

Another area where AI can prove invaluable is client communication and intake. Lawyers and staff often deal with a high volume of clients seeking initial information and basic legal advice. ChatGPT can be prompted to inspire answers to common questions, reference specific legal information, and assist with the intake process. This not only saves time for lawyers but also provides potential clients with immediate guidance, enhancing the overall client experience.

Additionally, AI can assist practitioners in case management and organization. ChatGPT can contribute to the efficient organization and categorization of case-related materials, ensuring that crucial documents, correspondence, and deadlines are easily accessible. With AI-assisted docketing and calendaring, lawyers can better manage their caseloads and meet important deadlines with confidence.

In summary, AI technologies like ChatGPT have significant relevance in the everyday practice of law. By supporting lawyers in legal research, document drafting and review, client communication and intake, and case management, AI can streamline processes, improve productivity, and enhance the overall quality of service provided by attorneys to their clients. As we delve further

into the benefits of integrating ChatGPT into law firms in the following section, we will explore the economic advantages and how AI can enhance the delivery of legal services.

III. Benefits of Integrating ChatGPT into Law Firms

A. The economic and productivity benefits of AI in law firms

Integrating ChatGPT and other AI technologies into law firms offers various economic and productivity benefits. By leveraging AI, law firms can optimize their operations, improve efficiency, and ultimately increase profitability.

First, the use of AI can significantly reduce the time spent on labor-intensive tasks. ChatGPT can automate repetitive and time-consuming processes such as legal research, document drafting, and review. This allows lawyers to allocate their time and expertise to higher-value tasks that require critical thinking and strategic decision-making. Consequently, law firms can handle a greater volume of work without compromising on quality, leading to increased productivity and revenue.

Moreover, AI-powered automation can minimize the possibility of errors and oversights. ChatGPT can analyze documents, identify inconsistencies, and flag potential issues for review. This helps mitigate risks associated with human error and ensures the accuracy and quality of legal work. By avoiding costly mistakes, law firms can reduce the risk of malpractice claims and reputational damage, resulting in potential cost savings and enhanced client satisfaction.

Additionally, AI can facilitate faster and more efficient document processing. With ChatGPT's ability to automatically generate

drafts and templates, law firms can streamline the creation of standard legal documents, such as contracts or letters. This eliminates the need to start from scratch for each document, saving substantial time and effort. Furthermore, AI can help automate the review and validation of documents, ensuring compliance with specific legal requirements or internal firm policies. These improvements in document handling can lead to quicker turnaround times, improved client service, and increased overall operational efficiency.

B. Insights into how AI can enhance the delivery of legal services

AI technologies like ChatGPT offer several ways to enhance the delivery of legal services within law firms.

One significant aspect is improved client satisfaction. By leveraging AI for client communication and intake, law firms can provide more immediate and accurate responses to client inquiries. ChatGPT can assist in answering basic legal questions, providing initial information, and managing appointments. This streamlined communication process helps create a positive client experience, improves responsiveness, and strengthens client trust and loyalty.

Additionally, AI can contribute to better resource allocation within law firms. By automating certain tasks, lawyers can prioritize their efforts toward complex and high-value matters, ensuring that their expertise is optimally utilized. This leads to more efficient resource management and allows law firms to take on a larger volume of cases while maintaining a high standard of service.

Furthermore, the use of AI can enhance collaboration and knowledge-sharing among legal professionals. ChatGPT can serve as a centralized repository of legal knowledge and expertise. It can assist lawyers in accessing and sharing relevant information, best practices, and lessons learned. This fosters a collaborative environment within the firm, facilitates continuous learning, and promotes the development of expertise across various practice areas.

In summary, integrating ChatGPT into law firms provides significant economic and productivity benefits. By leveraging AI technology, law firms can optimize their operations, increase efficiency, and improve client satisfaction. The inherent capabilities of AI, such as automation, error reduction, and improved resource allocation, contribute to a more streamlined and effective delivery of legal services. As we delve deeper into the specific applications of ChatGPT in the practice of law, we will explore how AI can revolutionize tasks such as legal research, document drafting, client communication, and case management.

IV. ChatGPT as a Legal Research Assistant

A. Use of AI in conducting legal research

Legal research is a fundamental task for lawyers, requiring a thorough examination of applicable laws, regulations, and case precedents. ChatGPT can serve as a valuable legal research assistant, revolutionizing the way lawyers gather and analyze legal information.

AI technologies like ChatGPT have the ability to comb through vast databases of legal resources, including statutes, case law, legal opinions, and scholarly articles. This

enables lawyers to access a wealth of legal knowledge with greater speed and efficiency. By inputting a legal question or topic, ChatGPT can generate relevant summaries and provide a comprehensive overview of the key legal principles and authorities surrounding the issue. This saves lawyers significant amounts of time that would have been spent manually sifting through numerous sources.

Moreover, ChatGPT can assist in analyzing and synthesizing legal information. It can identify the most relevant and persuasive cases or statutes that support a particular argument or legal position. By presenting this information in a concise and digestible manner, ChatGPT helps lawyers develop more robust legal arguments and enhances their ability to provide accurate and comprehensive advice to clients.

In addition to traditional legal research, ChatGPT can also monitor and analyze real-time legal developments. It can keep lawyers updated on new court decisions, legislative changes, and legal trends. By providing timely insights and alerts, ChatGPT enables lawyers to stay at the forefront of legal developments and ensures that their work is consistently informed by the most recent precedents and regulations.

B. Analysis and summarizing of legal documents with AI assistance

Another area where ChatGPT proves invaluable is in the analysis and summarization of legal documents. Lawyers often face the arduous task of reviewing lengthy contracts, pleadings, and other legal documents. ChatGPT can help streamline this process by automatically extracting key information, summarizing complex legal language, and identifying pertinent sections.

By leveraging natural language processing capabilities, ChatGPT can analyze the structure and content of legal documents. It can identify clauses, provisions, and other relevant details, allowing lawyers to quickly pinpoint the specific information they need. This significantly reduces the time and effort required for document review and helps lawyers gain a comprehensive understanding of the legal document's content, facilitating more effective representation and decision-making.

Furthermore, ChatGPT can assist lawyers in identifying potential issues or pitfalls in legal documents. It can flag ambiguities, inconsistencies, or clauses that may conflict with legal requirements or common practices. This helps lawyers ensure that legal documents are accurate, comprehensive, and aligned with their clients' goals and interests.

In summary, ChatGPT serves as an indispensable assistant for legal research and document analysis. By leveraging AI technology, lawyers can access a wealth of legal information more efficiently, develop robust legal arguments, and stay updated with real-time legal developments. Additionally, AI assistance in analyzing and summarizing legal documents saves lawyers valuable time and helps identify potential issues or areas of concern. As we explore the application of ChatGPT to document drafting and review in the following section, we will delve into how AI can enhance the efficiency and accuracy of these crucial tasks.

V. Document Drafting and Review with ChatGPT

A. Explanation of how ChatGPT can assist in drafting legal documents

Document drafting is a key responsibility for lawyers, requiring precision, attention to

detail, and knowledge of legal language and conventions. ChatGPT can provide valuable assistance in this process by offering suggestions, improving language clarity, and ensuring compliance with legal standards.

When drafting legal documents, lawyers often encounter challenges such as finding the right language to express their client's intentions, ensuring that all necessary provisions are included, and maintaining consistency throughout the document. ChatGPT can help address these challenges by analyzing the context and purpose of the document and generating suggestions for content and structure. It can propose alternative wording, offer phrasing options, and alert lawyers to potential pitfalls or missing clauses based on its understanding of legal norms and best practices.

Additionally, ChatGPT can enhance the clarity and readability of legal documents. It can identify complex or convoluted language and propose simpler alternatives that maintain legal precision. By presenting legal concepts and language in a more straightforward manner, ChatGPT helps ensure that legal documents are accessible and easily understood by all parties involved.

B. Use of AI for reviewing legal documents for errors and potential issues

Reviewing legal documents for errors and potential issues is a critical yet time-consuming task for lawyers. ChatGPT can assist in this process by automatically detecting errors, inconsistencies, and potential legal issues.

ChatGPT's natural language processing capabilities enable it to analyze the structure and content of legal documents with a keen eye for detail. It can identify typographical

errors, grammatical mistakes, and inconsistent use of terminology. By flagging these errors, ChatGPT helps lawyers ensure the accuracy and professionalism of their written work.

Furthermore, ChatGPT can help identify potential legal issues or risks within legal documents. It can recognize clauses that may contradict applicable laws or fail to adequately protect the client's interests. ChatGPT can also highlight missing provisions or requirements that should be addressed to improve the legal document's effectiveness. By providing these insights, ChatGPT helps lawyers identify and rectify potential pitfalls, reducing the risk of legal disputes or adverse consequences in the future.

Moreover, ChatGPT can assist with ensuring compliance with legal standards and requirements. It can review documents for adherence to specific formatting guidelines, jurisdiction-specific rules, or industry-specific regulations. This attention to detail helps lawyers uphold professional standards and ensures that legal documents meet the necessary formalities and standards of the relevant jurisdiction.

In summary, ChatGPT offers valuable support in the process of document drafting and review. By providing suggestions, improving clarity, and identifying errors and potential issues, AI assistance enhances the efficiency and accuracy of legal document preparation. As we delve into the application of ChatGPT in client communication and intake in the following section, we will explore how AI can streamline these crucial aspects of legal practice.

VI. Client Communication and Intake Through ChatGPT

A. Use of AI in answering basic legal questions and providing initial client information

Client communication is a cornerstone of legal practice, as it establishes trust, manages expectations, and ensures effective representation. ChatGPT can assist lawyers in this process by answering basic legal questions and providing initial information to potential clients.

ChatGPT can be prompted with a knowledge base of frequently asked questions and general legal information. When potential clients reach out with basic inquiries, ChatGPT can provide immediate responses based on the pre-programmed information. This saves lawyers time and allows them to focus on more complex legal matters that require their expertise. Additionally, it ensures consistent and accurate responses, reducing the risk of miscommunication or the dissemination of incorrect legal information.

Moreover, ChatGPT can assist in providing initial client information. By collecting essential details such as the purpose of the legal consultation, names of parties involved, and key dates, ChatGPT can help streamline the initial intake process. This ensures that lawyers have relevant information readily available when conducting a more in-depth assessment of the potential client's case. It also enhances efficiency by automating the collection and organization of initial client data.

B. AI assistance in handling client intake forms and scheduling appointments

Client intake forms and scheduling appointments are integral components of client management. ChatGPT can provide valuable assistance by automating these processes and ensuring a seamless experience for both lawyers and clients.

Traditionally, client intake forms require manual completion, which can be time-consuming and prone to errors. ChatGPT can streamline this process by guiding potential clients through an automated intake form, prompting them to enter required information and answer relevant questions. This not only saves time for lawyers but also ensures that all necessary information is collected in a standardized and organized manner. ChatGPT can then automatically populate client profiles or generate summaries of the intake form, allowing lawyers to review and analyze the information more efficiently.

Additionally, ChatGPT can assist in scheduling appointments. Potential clients often need to coordinate their schedules with lawyers, which can be a complex and time-consuming task. By leveraging AI algorithms, ChatGPT can examine lawyers' availability and propose suitable appointment times for clients. This automated scheduling process eliminates the need for back-and-forth communication and helps ensure that appointments are scheduled promptly and with minimal effort.

In summary, ChatGPT plays a valuable role in client communication and intake processes. By answering basic legal questions, providing initial client information, automating the completion of intake forms, and assisting with scheduling appointments, ChatGPT enhances efficiency, ensures accurate data collection, and provides a seamless experience for both lawyers and clients. As we explore the application of ChatGPT in legal document

automation in the following section, we will delve into how AI can streamline the generation of repetitive legal forms and agreements.

VII. Legal Document Automation Using ChatGPT

A. How AI can help develop templates and automate standard legal documents

Legal document automation is a time-consuming task that often involves generating repetitive forms and agreements. ChatGPT can play a crucial role in this process by assisting in the development of templates and automating the creation of standard legal documents.

By leveraging ChatGPT's natural language processing capabilities, lawyers can create templates for various legal documents such as contracts, wills, or lease agreements. These templates can be pre-programmed with the necessary clauses, provisions, and language specific to the document type or jurisdiction. When generating a new document, ChatGPT can automatically populate the template with client-specific details, such as names, dates, or specific terms. This automation saves lawyers significant time and effort, allowing them to efficiently create accurate and standardized legal documents.

Furthermore, ChatGPT can assist in automating the completion of repetitive forms. Many legal processes require filling out complex forms with repetitive sections. ChatGPT can guide clients through the completion of these forms by asking tailored questions based on the specific requirements of each section. As users input their responses, ChatGPT can populate the corresponding fields in the form, ensuring

that all required information is accurately captured. This streamlines the form-filling process and minimizes errors that often arise from manual data entry.

B. Streamlining the generation of repetitive legal forms and agreements with AI

The generation of repetitive legal forms and agreements can be a tedious and error-prone process. Generative AI, such as ChatGPT, can streamline this task and enhance the accuracy and efficiency of the process.

ChatGPT can ensure consistency across multiple iterations of similar legal documents. Lawyers often encounter situations where they need to generate multiple versions of the same form or agreement with slight modifications. By utilizing ChatGPT, lawyers can modify existing templates or documents to reflect the required changes while ensuring consistency in language and formatting. This not only saves time but also reduces the possibility of errors or discrepancies between different versions of the same legal document.

Moreover, ChatGPT can assist in automating the customization of legal documents based on specific client requirements. Using client-specific input, such as desired terms, conditions, or preferences, ChatGPT can automatically generate customized agreements or contracts. This eliminates the need for manual customization, reducing the risk of errors or omissions. It also enhances client satisfaction by providing personalized legal documents that meet their specific needs.

In summary, ChatGPT significantly aids in legal document automation by assisting in the development of templates, automating the completion of repetitive forms, and

streamlining the generation of customized legal documents. By leveraging AI technology, lawyers can save time, improve accuracy, and ensure consistency across multiple legal documents. As we explore the application of ChatGPT in case management and organization in the following section, we will delve into how AI can streamline tasks such as docketing, calendaring, and deadline management.

VIII. Case Management and Organization with ChatGPT

A. Use of AI in managing and organizing case-related materials

Effectively managing and organizing case-related materials is critical for lawyers to provide efficient representation and ensure case success. ChatGPT can serve as a valuable tool in this process by assisting in case management and organization.

ChatGPT can help streamline the organization of case-related documents, such as pleadings, correspondence, research materials, and exhibits. It can automatically categorize and tag documents based on their relevance and content. By implementing AI-powered document management systems, lawyers can easily search, retrieve, and organize case-related materials, saving valuable time and effort.

Furthermore, ChatGPT can assist in analyzing and summarizing case-related documents. It can extract key information from deposition transcripts, court opinions, or expert reports, providing lawyers with concise summaries of the most relevant points. This facilitates efficient case analysis and preparation, enabling lawyers to focus on developing persuasive arguments and strategies.

B. AI-assisted docketing, calendaring, and deadline management

Docketing, calendaring, and deadline management are critical aspects of legal practice that require careful attention to detail and accurate tracking. ChatGPT can offer valuable assistance in these areas, ensuring that lawyers never miss important dates or deadlines.

ChatGPT can automatically populate a case calendar with key milestones, deadlines, and court appearances based on the relevant rules, statutes, and court orders. Lawyers can rely on AI assistance to track and notify them of upcoming events, enabling them to effectively manage their caseloads and allocate their time and resources accordingly. By reducing the risk of missed deadlines, ChatGPT helps lawyers uphold their professional responsibilities and avoid potential legal consequences.

Moreover, ChatGPT can help automate the calculation of deadlines. It can analyze court rules, case-specific factors, and applicable timelines to determine the exact dates and deadlines required for case progression. This eliminates the need for manual calculations and reduces the possibility of errors or miscalculations.

Overall, ChatGPT serves as an invaluable tool for case management and organization. By organizing case-related materials, analyzing and summarizing documents, and assisting with docketing, calendaring, and deadline management, AI enhances the efficiency and effectiveness of legal representation. In the following section, we will explore how ChatGPT can assist lawyers in improving their legal writing by providing suggestions and ensuring clarity and adherence to legal standards.

IX. ChatGPT as a Legal Writing Aid

A. How AI can provide suggestions and improvements for legal writing

Effective legal writing is essential for lawyers to convey their arguments, advocate for their clients, and present their case persuasively. ChatGPT can serve as a valuable legal writing aid by providing suggestions and improvements to enhance the quality and clarity of written materials.

By leveraging AI technology, lawyers can input their draft legal documents, such as briefs, memos, or legal opinions, into ChatGPT for analysis. ChatGPT can then provide suggestions on language, structure, and organization. It can propose alternative phrasing, identify excessively complex sentences, and highlight potential areas for improvement. These AI-generated suggestions can help lawyers refine their written work, ensuring that their arguments are logically sound, coherent, and easily understandable by judges, clients, and other parties involved in the legal process.

Furthermore, ChatGPT can assist in ensuring adherence to legal standards and conventions. It can analyze the document's content and identify any deviations from established legal norms or requirements. For instance, ChatGPT can flag instances of improper citation formatting, inconsistent use of terminology, or issues with legal formatting rules. This helps lawyers maintain professionalism and ensures that their written materials meet the highest standards of legal practice.

B. Ensuring clarity and adherence to legal standards in written materials with AI

Clarity and adherence to legal standards are crucial aspects of legal writing. ChatGPT can play a significant role in assisting lawyers in achieving these goals.

ChatGPT can analyze legal documents for clarity and suggest improvements to enhance their readability and comprehensibility. It can identify complex legal jargon or convoluted phrasing and propose simpler alternatives that maintain legal precision. This helps lawyers communicate their arguments in a clear and concise manner, ensuring that their intended message is effectively conveyed to the intended audience.

Moreover, ChatGPT can assist in ensuring adherence to legal standards and guidelines. It can analyze legal documents for consistency in terminology, citation format, and legal citation rules. By flagging any inconsistencies or deviations from established standards, ChatGPT helps lawyers maintain professionalism and uphold the integrity of their written work.

In summary, ChatGPT serves as a valuable legal writing aid, providing suggestions and improvements to enhance the quality, clarity, and adherence to legal standards in written materials. By leveraging AI technology, lawyers can refine their arguments, ensure clear and precise communication, and meet the highest standards of legal practice. As we conclude this article in the next section, we will reflect on the transformative potential of AI in the legal field and anticipate future developments and advancements in AI for legal practice.

PART 2 – PRACTICAL PROMPTS

X. ChatGPT Real Life Examples

Proposed Orders

Scenario #1: Drafting/Updating Proposed Order with Ruling from Court

Facts: You've argued your motion and the court has issued complex alterations that you need to incorporate into a new proposed order.

ChatGPT Prompt:

"You are a brilliant Texas attorney. Your ultimate task is to adjust a draft proposed order to follow with the following rulings from the court [Insert Rulings]. Here is the order that you will be updating [Insert Proposed Order]"

Drafting DCO

Scenario #2: Inserting Proper Dates Into Proposed DCO

Facts: You have a trial date and need to quickly draft a DCO that has dates reasonably spaced apart that do not fall on a weekend or holiday.

ChatGPT Prompt:

"You are a brilliant Texas attorney and calendar expert. Your task is to adapt an old DCO to a new case with completely new deadlines. Note, it is imperative that the dates do not fall on any weekends or holidays. All dates flow from the trial date which is [INSERT TRIAL DATE]. All other dates should be reasonably spaced apart based on the deadline involved in relation to other

deadlines. Here is the example DCO to adopt to the dates of this case described above: [Insert Old DCO]"

Drafting Correspondence

Scenario #3: Make Okay Letters Great

Facts: You need to quickly get a letter out to client providing a case update but don't want to waste time and focus on ensuring eloquence so you can instead focus on content.

ChatGPT Prompt:

"You are an eloquent writer with great communication skills. Your task is to convey the following: [Insert a rough draft or simple points of what the message should say]"

Scenario #4: Convey Empathy

Facts: You've received a tough ruling in an emotional case and want to convey the results in an empathetic way.

ChatGPT Prompt:

"You are a brilliant Attorney. Your task is to convey the following to a client in a manner that is empathetic and easy to understand: [Insert a rough draft or simple points of what the message should say]"

Scenario #5: Make a Mean Letter Nice

Facts: you have had it with opposing counsel and draft a message letting them know how you really feel. Before you hit send your judgment gets the better of you. You want to convey the contents of the message but cannot find the words to do so nicely.

ChatGPT Prompt:

“You are a kind and empathetic attorney dealing with an opposing counsel who is arrogant and rude. Your task is to convey the following letter in a nice and professional manner: [Insert the message you REALLY want to send].”

Review Drafts for Consistency of Word Choice and Pronouns

Scenario #6: Ensuring Consistent Use of Gendered Terms in a Document

Facts: You’ve drafted a document, but you're unsure if all the gendered terms used are consistent and correctly applied.

ChatGPT Prompt:

“You are a meticulous Texas attorney. Your task is to review the following document for consistency in the use of gendered terms. For reference [Insert gender info]. Here is the document you are reviewing: [Insert Document]”

Mediation

Scenario #7: Multiple Representation of 50/50 Asset Division

Facts: You have a list of assets included in a divorce estate. You need to provide several statistical options for a fair 50/50 division of these assets.

ChatGPT Prompt:

“You are a brilliant Texas attorney. Your task is to analyze the list of assets in a divorcing couple’s estate and generate several possible avenues for dividing property in a 50/50

allocation. Here is a copy of the community assets: [Paste table of assets].”

Scenario #8: Explaining the Benefits of Mediation in Divorce Cases

Facts: Your client is contemplating whether to settle their divorce case through mediation. They need to understand the benefits of this process in Texas.

ChatGPT Prompt:

“You are a brilliant Texas attorney. Your task is to offer a straightforward but thorough explanation of why a client should consider settling their divorce case in Texas through mediation, emphasizing the benefits, cost-effectiveness, and potential outcomes of this process given the facts of their case. Here are some basic facts to use in drafting the output: [Insert case facts].”

Thank You Letters

Scenario #9: Drafting a Thank You Letter to a Referral Source

Facts: Charles Hardy referred a difficult divorce case of John Smith to your law firm. You appreciate this referral and want to express your gratitude.

ChatGPT Prompt:

“You are a brilliant Texas attorney. Your task is to draft a thank you letter to [Charles Hardy] expressing gratitude for his referral of the [John Smith] divorce case. Be sure to mention that the case is challenging, but you appreciate his trust in your capabilities to handle it.”

Scenario #10: Drafting a Thank You Letter to a Potential Client

Facts: John Doe, a potential client, recently stopped by your office to interview you about their case. You appreciate his time and want to express your willingness to assist him further.

ChatGPT Prompt:

“You are a brilliant Texas attorney. Your task is to draft a thank you letter to [John Doe] expressing appreciation for taking the time to visit your office and interview you about their case. Offer to be available by phone should he have any additional questions.”

Risk Assessment

Scenario #11: Risk Assessment for Hunting on a Private Ranch in Texas

Facts: Your client is considering offering hunting for pay on your private ranch in Texas. You want a primer that inspires understanding of broad risks involved in a landowner’s liability.

ChatGPT Prompt:

“You are a brilliant Texas attorney. Your task is to provide an overview of the legal risks associated with allowing hunting for pay on a private ranch in Texas. Discuss potential liabilities, relevant regulations, insurance considerations, and any other pertinent risks.”

Scenario #12: Risk Assessment for Drafting Prenuptial Agreements for Other Lawyers

Facts: You have been approached to draft a prenuptial agreement for a fellow lawyer.

You want to understand the specific legal risks associated with this proposal.

ChatGPT Prompt:

“You are a brilliant Texas attorney. Your task is to outline the potential legal risks associated with drafting prenuptial agreements for other lawyers. Discuss issues like conflict of interest, professional liability, informed consent, and other potential pitfalls.”

Marketing

Scenario #13: Creating Attorney Bios for Law Firm’s Website

Facts: Your law firm’s website needs updated attorney bios to inform potential clients about the professional experience and qualifications of your legal team and members of your staff.

ChatGPT Prompt:

“You are a brilliant Texas attorney. Your task is to create engaging and professional attorney bios for your law firm’s website based on the following information that I will provide. Ensure to highlight each attorney’s unique skills, experiences, and contributions to the firm. Here is the attorney info: [Insert old bio/raw attorney info]”

Scenario #14: Creating Informative Client Articles for Law Firm’s Website

Facts: Your law firm wants to provide valuable content to its clients by posting informative articles on the firm’s website.

ChatGPT Prompt:

“You are a brilliant Texas attorney. Your task is to create an informative article on the following legal topic for your firm’s website. The content should be easily understood by clients, offering insights that can help them navigate their legal issues. Here is the information to use in crafting the article: [Insert relevant information]”

Scenario #15: Creating Social Media Content for your Law Firm

Facts: Your law firm wants to expand its digital presence and engage more effectively with its online audience. You have been asked to create content for the firm’s social media platforms.

ChatGPT Prompt:

“You are a brilliant Texas attorney. Your task is to create engaging and informative social media content for your law firm. This can include updates about the firm, legal advice, past case victories, or other relevant information that can attract and engage the firm’s online audience. Your output should space out the posts in [insert time increments (one week)] over the next 3 months. The posts should highlight the following [Insert relevant firm information, case information, holidays you want to include, etc.]”

Scenario #16: Creating a Christmas Card/Mailer

Facts: The holiday season is approaching, and your law firm wants to send out Christmas cards/mailers to its clients, expressing appreciation and offering well wishes.

ChatGPT Prompt:

“You are a brilliant Texas attorney. Your task is to create content for a warm and professional Christmas card/mailer for your law firm. The message should convey your firm’s appreciation for its clients, extend best wishes for the holiday season, and strengthen the client-lawyer relationship.”

A. Present value calculations

Scenario #17: Determining the Present Value of a Pension Plan

Facts: Spouse A is considering giving up rights in Spouse B’s pension plan. Spouse B’s plan is expected to pay out \$1500 per month, starting in 15 years, for a period of 20 years. We need to determine the present value of this pension plan at a 5% discount rate to make an informed decision.

*Note: must verify number outputs. Mathematical equations are dependent on advanced model like GPT-4. ChatGPT’s free model is likely to make up results.

ChatGPT Prompt:

“You are a brilliant Texas attorney. Your task is to calculate the present value of a series of payments that are \$1500 per month, starting in 15 years, and lasting for 20 years, assuming a 5% annual discount rate?”

Scenario #18: Calculating Child Support Value for Life Insurance Purposes

Facts: Spouse C is required to pay child support of \$2500 per month for a period of 18 years. We need to determine the present value of this obligation at a 5% discount rate to make an informed decision about life insurance coverage.

ChatGPT Prompt:

“You are a brilliant Texas attorney. Your task is to calculate the present value of a series of payments that are \$2500 per month, lasting for 18 years, assuming a 5% annual discount rate?”

XI. Conclusion: Future of ChatGPT in the Legal Profession

A. Reflection on the transformative potential of AI in the legal field

The integration of AI technologies like ChatGPT has the potential to transform the legal profession, enhancing efficiency, productivity, and client service. AI can automate repetitive tasks, streamline processes, and provide valuable support to lawyers in various aspects of their practice. As we have explored throughout this article, ChatGPT can assist in legal research, document drafting and review, client communication and intake, case management and organization, legal document automation, and legal writing. This transformative potential of AI brings new possibilities for lawyers to streamline their work, deliver higher-quality legal services, and improve client satisfaction.

B. Anticipation of future developments and advancements in AI for legal practice

As AI technology continues to advance, we can anticipate further developments and advancements that will further enhance its application in the legal field. ChatGPT is currently capable of generating human-like text responses, but future iterations may be more context-aware, allowing for even more nuanced and accurate assistance. We can expect improvements in language understanding, legal knowledge databases,

and the integration of ethics and professional standards into AI systems designed for legal practice.

Furthermore, future AI systems may incorporate iterative machine learning capabilities, continuously learning from lawyer interactions and expanding their knowledge base. This would enable AI to provide even more tailored and accurate suggestions, improving its ability to assist with complex legal research, document analysis, and case management. Additionally, the integration of predictive analytics and data mining may revolutionize legal practice by enabling AI systems to forecast case outcomes, identify patterns, and predict potential legal issues.

We can also anticipate increased integration of AI technologies into existing legal software platforms and tools. This integration will allow for seamless collaboration between lawyers and AI systems, making AI an integral part of the legal workflow. Ultimately, this integration will empower lawyers to focus on strategic decision-making, client advocacy, and other high-level tasks while leveraging AI for support and automation.

ChatGPT and AI technologies have immense potential to reshape the legal profession. By leveraging their capabilities to augment and automate certain tasks, lawyers can streamline their work, enhance efficiency, and provide higher-quality legal services. As the field of AI continues to evolve, we look forward to further advancements that will revolutionize legal practice, empower lawyers, and ultimately benefit clients.
